

**Aleksandr Solzhenitsyn**, a Russian intellectual, experienced the crimes of a totalitarian state first hand. He was arrested and sentenced to 8 years in a Russian labour camp, or gulag, and then spent more years in internal exile. His crime? He criticized Josef Stalin in a private letter.

“And how we burned in the camps later, thinking: What would things have been like if every Security operative, when he went out at night to make an arrest, had been uncertain whether he would return alive and had to say good-bye to his family? Or if, during periods of mass arrests, as for example in Leningrad, when they arrested a quarter of the entire city, people had not simply sat there in their lairs, paling with terror at every bang of the downstairs door and at every step on the staircase, but had understood they had nothing left to lose and had boldly set up in the downstairs hall an ambush of half a dozen people with axes, hammers, pokers, or whatever else was at hand?... The Organs would very quickly have suffered a shortage of officers and transport and, notwithstanding all of Stalin's thirst, the cursed machine would have ground to a halt! If...if...We didn't love freedom enough. And even more – we had no awareness of the real situation.... We purely and simply deserved everything that happened afterward.”

— Aleksandr I. Solzhenitsyn , *The Gulag Archipelago* 1918–1956

# Shepherd's Corner

Dear parishioners,

Afraid of Covid? Consider emigrating to a safe country, like Nigeria. For every 1 Covid death there, 62 people die in Canada, 166 people die in the USA, and 190 die in the UK. In fact, most African nations have similar death per capita numbers: Kenya 4.3, Ethiopia 2.7, DR Congo 0.1, Uganda 0.7, etc. [1] What explains the 1:62 Nigeria-Canada ratio? Ever heard it mentioned, let alone explained? The success is especially tremendous because the W.H.O. predicted 10 million deaths there in the next epidemic, overshooting the real mark by 9.9 million.[2] How is Africa saving lives?

Official explanations are laughable: their “rapid response,” their “regional collaboration,” etc. [3] The real explanation is the elephant in the room: everyone in Africa takes hydroxychloroquine.[4] Nobody could have predicted that this drug combined with zinc fights off the Wuhan virus. The CDC called HCQ in 2017 one of the most common, safest drugs on the planet. “Hydroxychloroquine can be prescribed to adults and children of all ages. It can also be safely taken by pregnant women and nursing mothers.” [5] Suddenly, in 2020, it was vilified as dangerous, and the subject of fraudulent studies, silence, and prohibitions.

Nor is it the only success: India (death per capita 12) is achieving success with Ivermectin. There are other treatments too.

“85% of Covid-19 deaths in America were easily preventable,” so says Dr. McCullaugh, a doctor exceedingly qualified to make such a sweeping judgement. He discusses the war on truth and freedom in the medical field. Please read his testimony. [6] He, of course, was banned from social media. Lots of medical people attest to their effectiveness. [7] Their voices are silenced by de-platforming, or immature disparagement. [8]

Doug Ford’s mantra “it’s all about saving lives” rings hollow since his government ignores the wild success of African nations, etc. Are doctors in Ontario encouraged or even permitted to prescribe these cheap, available, life-saving measures? Medicine in Ontario is being hampered by politics.

Hospitals being overwhelmed? When have we ever heard of treatments at home as a way of avoiding hospitalizations? The silence regarding any available treatments makes it seem like there are none, which is a lie.

I am not defending a drug so much as public discourse and personal freedom. All of these are disappearing in a global, full-frontal attack. A former VP of Pfizer has some interesting details about the lies Western governments are shoveling. [9]

Emergency lockdown? There are currently 6 people in the ICU in the Niagara Region due to Covid-19 (0.7 % of 817 people). We commiserate with those 6, but 6 does not an emergency make. What about dangerous new variants? This is now the boogie-man de jour.

Communism is being established by lies and coercion. Randy Hillier, independent MPP, sees it clearly: “This is a war on freedoms,” he said, calling for civil disobedience.[10] Can a Catholic, in good conscience, wage war? Yes. Is it time?
